Forté Pressure Relieving Heel Elevator

The Forté Heel Elevator supports the patient’s leg and providing suspension to the critical heel region. Manufactured using premium immersion foams and a pressure care covering, the Forté Heel Wedge provides effective support for a wide range of patients.

**PROFILED PRESSURE RELIEVING CORE**
- High quality, open cell foam
- Anti-microbial treatment
- Tapered for maximum patient comfort

**4-WAY STRETCH, PRESSURE CARE MATERIAL (STANDARD)**
- Vapour permeable and breathable
- Anti-shear
- Fire retardant, resistant to body fluids and bacteria
- Wipe-clean
- Optional: heavy duty PVC material for maximum durability

**ROBUST SEAMS**
- High frequency sealed and welded seams

**APPLICATIONS**
- Hospitals
- Aged Care
- Home Care

---

Forté Sonnet Pressure Relieving Heel Cushion

The Forté Pressure Relieving Heel Cushion provides effective protection to the critical Heel region. Manufactured to be able to be used in a variety of positions, the Forté Heel Cushion requires minimal education for clinical care staff and is popular within acute and frail aged care for its simplistic design and effectiveness. Manufactured using premium immersion foam and a pressure care covering, the Forté Heel Cushion is suited for a wide range of patients.

**DUAL LAYER, PRESSURE RELIEVING CORE**
- High quality, open cell foam
- Anti-microbial treatment
- Simplistic 4-way turn positioning

**OPEN CELL INNER CORE**
- Delivers excellent postural comfort
- Prevents patient from ‘bottoming-out’
- High quality, excellent durability

**4-WAY STRETCH, PRESSURE CARE MATERIAL (STANDARD)**
- Vapour permeable and breathable
- Anti-shear
- Fire retardant, resistant to body fluids and bacteria
- Wipe-clean

**PREMIUM GRADE, MEMORY FOAM SECONDARY LAYER**
- Pressure sensitive
- High temperature stability
- Vico-elastic cell structure provides excellent immersion and envelopment

**ROBUST SEAMS**
- High frequency sealed and welded seams

**APPLICATIONS**
- Hospitals
- Aged Care
- Home Care
