

MEDICAL MATTRESS EXPERTS

Forté Pressure Care Stretcher Support
Surfaces deliver excellent patient comfort and
uncompromised care. Utilising premium quality
foam and material selected for their performance,
the Forté Stretcher Support Surfaces provide
consistent care in demanding medical environments
and are customizable to suit any patient stretcher
configuration, size and function. Forté Stretcher
mattresses are specifically designed to provide
sustained support and pressure injury prevention for
a significantly longer period of time than the typical
stretcher mattress. This is a benefit for situations
where patients are kept on a stretcher waiting for a
bed to become available for a longer period of time
than anticipated.

Icon IPT Patient Transport Pressure Care Stretcher Mattress

The Icon IPT provides excellent pressure care, comfort and support for patient transport and ambulance journeys. Answering requirements from the patient transport and Ambulance sectors, the Icon IPT provides patients a more comfortable transfer and greater protection against pressure injury. High performance foam and covering materials are utilised the manufacture of the Icon IPT to provide exceptional durability in demanding patient transfer situations. The core design provides superior shock absorption for additional comfort during stretcher transfer. The Icon IPT is customisable to suit any patient stretcher configuration, size and function.

Features

DUAL DENSITY, GRADED CORE

- Graded for immersion and support
- ✓ High performance, premium quality foam
- Anti-microbial treatment applied to foam maximises longevity and core micro-climate

AIROFORM MEMORY MEDIUM IMMERSION INTERFACE LAYER

- ▼ High shock absorption properties enhancing patient comfort
- ▼ High Temperature Stability to deliver consistent immersion, performance and comfort
- Maximises Patient contact with Support Surfaces Providing Pressure Redistribution
- Alleviates localised pressure points
- Depth calibrated to maximise functionality and patient mobility
- ▼ Visco-elastic/Memory Foam cell structure provides low-shear surface
- Firmness: Medium

ANGLED STRENGTHENED SIDE REGION

- Provides lateral support and increased stability within the support surface
- ▼ Facilitates patient ingress/egress by providing additional support

PREMIUM FIRM FOUNDATION LAYER

- Provides protection against 'bottoming-out' during transfer, repositioning and whilst in the inclined/fowler position
- Provides exceptional comfort, support for repositioning and patient care

TRIPLE SEGMENT, SPLIT BASE

Provides enhanced contouring with stretcher surface

SLOPED HEEL PRESSURE TRANSFER ZONE

- ▼ Enhances pressure relief & protection for critical at-risk heel region
- Offloads pressure from the patients heels and transfers it to calf area
- Unobtrusive, does not require any adjustment
