MEDICAL MATTRESS EXPERTS

Mattress Extension Bolster Kits

Pressure Care Mattress Width & Length Extension Bolster Kit

The Finalé Mattress Pressure Care Mattress Extension Bolster Kits overcome persistent issues of loose, ill-fitting non pressure care grade Side Bolsters on bed platforms with width extension/narrowing capability.

The cover has a unique safety linkage system connecting the bolster kit to the central mattress improving stability and reducing the risk of falls for the patient. The Side Bolsters replicate the foam structure of the respective centre mattress, providing additional capability for immersion and envelopment.

AVAILABLE ON ANY FORTÉ MATTRESS AND COVER

The mattress Extension Bolster kit customisation is available on any Forté mattress including low-high care static foam surfaces and also high-care high risk air systems

PRESSURE CARE SUPPORT SURFACE

- Bolsters are manufactured to the same specifications as the pressure care mattress it is being accompanied with.
- For example, in the instance of an Icon Maxx 500kg Bariatric Care Pressure Care Mattress, the extension bolsters would be made using the same mattress configuration - 4-layers of foam offering pressure care for patients with a medium risk of pressure injury and supporting a weight loading of up to 500kg

SAFETY LINKAGE SYSTEM

- Prevents bolsters becoming loose and misplaced as well as providing greater surface stability particularly for patient transfer and ingress/egress from bed platform.
- Fastened by a quick release press-stud system - no velcro.

HIGH FREQUENCY WELDED SEAMS

- All seams high frequency welded to reduce risk of infection and contamination.

Commonly Paired With:

SOVEREIGN S6 HIGH CARE SUPPORT PRESSURE CARE MATTRESS

Offers the highest level of care possible with a static Foam Support Surface - Designed to manage Micro-Climate, Shear, Support, and Pressure redistribution with high levels of immersion and Envelopment.
