EVACUATION
SYSTEMS

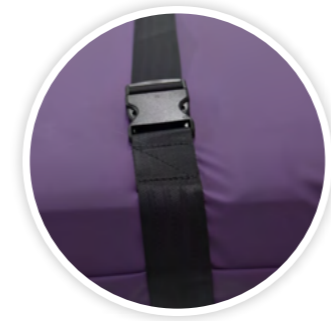

Forté Standard Evacuation System

The Forté Standard Evacuation System can be customised into most of the Forté Mattresses. With all seams High Frequency Sealed and Welded, the Forté Standard Evacuation System does not compromise on hygiene and infection control. Staff safety and risk of injury is mitigated as the Forté Standard Evacuation System significantly reduces force required to evacuate a patient across a range of floor surfaces.

EVACUATION STRAPS STORE IN POCKETS UNDERNEATH THE MATTRESS

- ✓ Prevents straps from becoming entangled with bed base and/or other equipment
- ✓ Straps are kept clean and free of infection
- ✓ Wipe Clean pocket with high frequency welded zipper for infection control

CROSS-PATIENT STRAPS

- ✓ High strength straps ensure stability and protection
- ✓ Large clips allow for quick attachment and tightening

DUAL EVACUATION PULL-POINT

- ✓ Option of pulling from head or foot end

HIGH FREQUENCY SEALED AND WELDED SEAMS

- ✓ All external seams High Frequency Sealed, Welded and fused for added infection control
- ✓ Prevents ingress of fluid through seams
