AIROFORM IMMERSION TECHNOLOGY

AIROFORM IMMERSION TECHNOLOGY

Forté Airoform Immersion technology adapts the latest in Foam expertise with proven Clinical parameters in order to Pressure Injury Prevention and provide optimal Patient Comfort.

Forté Airoform is available in 3 variations, Airoform Memory, Airoform Gel, and Airoform Response.

Each foam technology offers care and comfort unique to patient requirements and can be used individually or blended in order to improve patient care and outcomes.

Airoform Immersion foams are designed to be used at the skin interface level of support surfaces to achieve and improve;

- ✓ Microclimate Conditions
- ✓ Immersion, Pressure Redistribution and Minimising Localised Peak Pressures Damaging to Skin
- ✓ Reduction of Shearing and Related Forces
- ✓ Patient Comfort and Rest
- ✓ Patient Function and Mobility

AIROFORM MEMORY

Provides true Memory Foam Comfort, Enhanced Breathability and Lasting Performance

MICROCLIMATE

- ✓ Unique 'Breathe' perforations and open-cellular structure assists with dissipation of heat and circulation of air within the mattress
- ✓ Provides greater circulation than conventional Memory Foams

COMFORT

- ✓ Available in Extra Soft, Soft and Medium

SKIN INTEGRITY AND PRESSURE RELIEF

- ✓ Provides Excellent Pressure Redistribution and extremely low interface pressure
- ✓ Maximises the Contact Between the Patient and the Surface, Decreasing Interface Pressure
- ✓ Offers good heat stability and sustained immersion

CONTRAINDICATIONS

- ✓ 'Hot-Sleepers' may be better suited to Airoform Gel and/or Airoform Response
- ✓ May not be suited for patients requiring high surface responsiveness to aid repositioning
